

Bottle Warmers

Keep gels, oils, lotions and creams just above body temperature with the Whitehall Electric Bottle Warmer (EBW).

Features:

- Individual bottle sleeves for consistent heating
- Industrial heating element
- Front mounted, illuminated on/off switch
- Grounded hospital grade power cord
- Thermal fuse to prevent overheating
- Constructed of stainless steel
- Comes with table/wall mounting hardware & bottles

Use the heat from a Whitehall Thermalator™ to keep bottles of lotions, creams, gels and oils warm. This simple but effective side Bottle Warmer (SBW) is designed to hang from a T-4-S and a T-6-S Thermal-Pack heating unit and uses the absorbed energy to keep solutions warm. The SBW is constructed of stainless steel and requires no tools to attach.

SBW Shown with the T-4-S-EG Thermalator and optional Almond, Enviro-Glaze® coating.

ThermaSplint™

ThermaSplint comes standard with a solar powered digital thermometer that allows you to adjust the temperature with digital readouts for different splinting thermoplastics.

- Features:**
- Illuminated on/off switch
 - Stainless steel construction
 - 1/4 turn drain valve
 - Available in 220 voltage
 - Quick heat-up time
 - 2 sizes available

TS-1 (4.6 Gallons)

Goniometer™

Whitehall's Goniometer protractor head has 360° degree coverage in one degree increments to ensure ISOM accuracy.

- Features:**
- Available in 6", 8" and 12" lengths
 - Inches and centimeters are located on the arm of the goniometer
 - Constructed of durable Lexan

Product Dimensions

Thermalator™ Hot Pack Heating Units

Model Number/Description	Overall Dimensions L' x W' x H" (mm's)	Gallons	Liters
